RAJAT KATIYAR

Automation Test Engineer | Java · Selenium · REST Assured · AI-Assisted Test Automation

+91-8052236649 | katiyarrzt00@gmail.com | linkedin.com/in/rajat-katiyar-b322bb190

PROFESSIONAL SUMMARY

Automation Test Engineer with **4+ years** designing, building, and scaling enterprise web and API test **automation frameworks** across the insurance, travel, and mobility domains. Specializes in **Java, Selenium WebDriver, Cucumber (BDD), TestNG, REST Assured, and Postman**, with a strong focus on scalable web UI and REST API automation. Delivered **850+** automated regression scenarios across three enterprise regression suites and an early adopter of AI-assisted development — using **Devin AI** and **GitHub Copilot** to accelerate framework build-out, including leading the migration of **2,000+** legacy UFT test cases to Selenium.

SKILLS

Languages & Tools: Java, Selenium WebDriver, Cucumber (BDD), TestNG, REST API Automation, REST Assured, Postman

AI & Productivity: Devin AI, GitHub Copilot, AI-Assisted Test Migration, Prompt Engineering for Test Generation

Framework Architecture: Page Object Model (POM), Data-Driven Framework, TestNG DataProviders & Parallel Execution, ExtentReports, Cross-Device Testing

Build & DevOps: Maven, Jenkins, Git, Jira, Zephyr, CI/CD, Agile/Scrum

PROFESSIONAL EXPERIENCE

Tata Consultancy Service May 2022 – Present

Automation Test Engineer

Client: Hertz | *Automation Test Engineer* Nov 2025 – Present

- Engineered enterprise **BDD** web automation frameworks using **Java, Selenium, Cucumber,** and **TestNG**, scaling coverage to **400+** core web scenarios.
- Engineered **REST API automation with REST Assured and Postman**, validating request/response payloads, authentication flows, HTTP status codes, and JSON schema responses.
- Led the AI-assisted migration of **2,000+** legacy UFT test cases into Selenium using Devin AI and GitHub Copilot, reducing sprint development effort by **~50%** and manual regression effort by **~70%**.

Client: Royal Caribbean Group | *Automation Test Engineer* Jan 2025 – Oct 2025

- Architected reusable **Page Object Model (POM)** and data-driven testing components in **Java/Selenium** for core booking and reservation web workflows.
- Automated end-to-end regression workflows across releases, growing the automated suite to **200+** scenarios and reducing dependence on manual verification cycles.
- Collaborated with developers to triage, reproduce, and resolve defects surfaced through automation, while maintaining suite reliability by fixing flaky tests and reducing false failures across sprints.

Client: AG Insurance | *Manual & Automation Test Engineer* May 2022 – Dec 2024

- Developed BDD automation test scripts using **Java, Selenium WebDriver, Cucumber, and TestNG** for core insurance web portals, building an automated regression suite of **250+** scenarios.
- Designed and maintained modular **Selenium** web automation components in **Java**, improving script reusability and reducing maintenance overhead across the regression suite.
- Validated REST APIs, authentication flows, and JSON payloads using REST Assured and Postman to support backend testing for core insurance web portals.

EDUCATION

Bachelor of Technology (B.Tech.) — JSS Academy of Technical Education, Noida 2016 – 2020

CGPA: 7.5 / 10
